MSc Artificial Intelligence student at Queen's University Belfast with 2+ years at Hitachi Energy, covering AWS, Kubernetes/Argo CD, REST APIs, and enterprise deployments. across AWS, Kubernetes/Argo CD, APIs, and enterprise deployments.

Education

Queen's University Belfast - MSc Artificial Intelligence

Sep 2025 - Sep 2026

KL University - B.Tech CSE (CGPA: 9.11)

May 2019 - Jun 2023

Coursework

- Data Structures and Algorithms, Database Management System, Software Development Life Cycle, Statistics, Computer Architecture, Computer Networking, Machine Learning, Data Science & Analytics, Web Development, Design Patterns, Cloud Computing.

Experience

Software Engineer – Hitachi Energy | *VMs, Linux/Windows Servers, SSL, Networking* | Aug 2024 – Jul 2025

- Deployed Asset Suite, Ellipse, and Hitachi Vegetation Management (HVM) on virtual machines and physical servers, ensuring stable production-ready environments.
- Configured and optimized server settings (permissions, environment variables, resource allocation) and resolved access, port, and connectivity issues.
- Set up SSL certificates and secure web communication; created SOP-style documentation and coordinated with IT/ops during deployments and fixes.

Management Trainee – Hitachi Energy | *AWS, Kubernetes, Argo CD, REST APIs, Postman, DBeaver, QGIS* | Sep 2023 – Aug 2024

- Supported HVM back-office web applications and iOS field apps, delivering configuration, data preparation, inspection, and cost-related enhancements.
- Built and integrated REST APIs to support smooth data exchange; tested endpoints in Postman and handled database updates using DBeaver.
- Supported deployments and CI/CD workflows using AWS, Kubernetes, and Argo CD; used QGIS for geospatial analysis and visualization.

Intern – Hitachi Energy (Southwest Water Project) | *Groovy, SOAPUI, AWS, Oracle SQL* | Feb 2023 – Aug 2023

- Developed supplier management modules, implementing efficient CRUD functionality and automated supplier activation/deactivation workflows.
- Wrote Groovy-based automation, validated web services in SOAPUI, supported AWS deployments, and created reports/queries in Oracle SQL Developer.

Projects

Event Mania – Event Management System | *Python, Django*

- Built a Django-based event management web app that supports core workflows such as creating events, browsing listings, and handling user interactions in a clean, structured flow.
- Implemented reusable templates and server-side validation to keep pages consistent and reduce errors during form submissions and updates.

News Readers – Online News Portal | *JDBC, JSP, Servlets, Spring Boot*

- Developed a news portal for quick browsing of updates with a structured backend that supports categories and dynamic content rendering.
- Used JDBC for database connectivity and built core backend components with JSP/Servlets + Spring Boot to keep data handling and routing organized and maintainable.

Technical Skills

Languages: Python, Java, Groovy, C, JavaScript, SQL

Frameworks: Django, Spring Boot, React, Node.js

Cloud/DevOps: AWS, Docker, Kubernetes, Argo CD

Databases: MySQL, PostgreSQL, MongoDB, Oracle

Tools: GitHub, Postman, SOAPUI, DBeaver, QGIS

Certifications

AWS Solution Architect Associate; AWS Academy Graduate; Aviatrix Certified Engineer; Wipro Talent Next
